

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for:

MCGIMSEY SCOUT PARK

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the month of May 2023 we did not monitor or test for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

We have collected every required sample from the time of the missed sample (June and July 2023) and are no longer in violation. All samples have returned negative for coliform bacteria. For more information, please contact Warren Kingsbury at 210-500-0581 or at 10810 Wedgewood Dr., San Antonio, TX 78230.

Please Share this information with all the other people who drink this water, especially those who may not have received this notice directly. You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by McGimsey Scout Park.
